# WEATHER OF CONCERN

## Weather of Concern

Strong offshore winds and very dry conditions will result in critical fire weather conditions, including Red Flag Warnings, for portions of Southern California.

## **Active Weather Warnings, Watches and Advisories by County:**

# WEATHER SYNOPSIS BY REGION

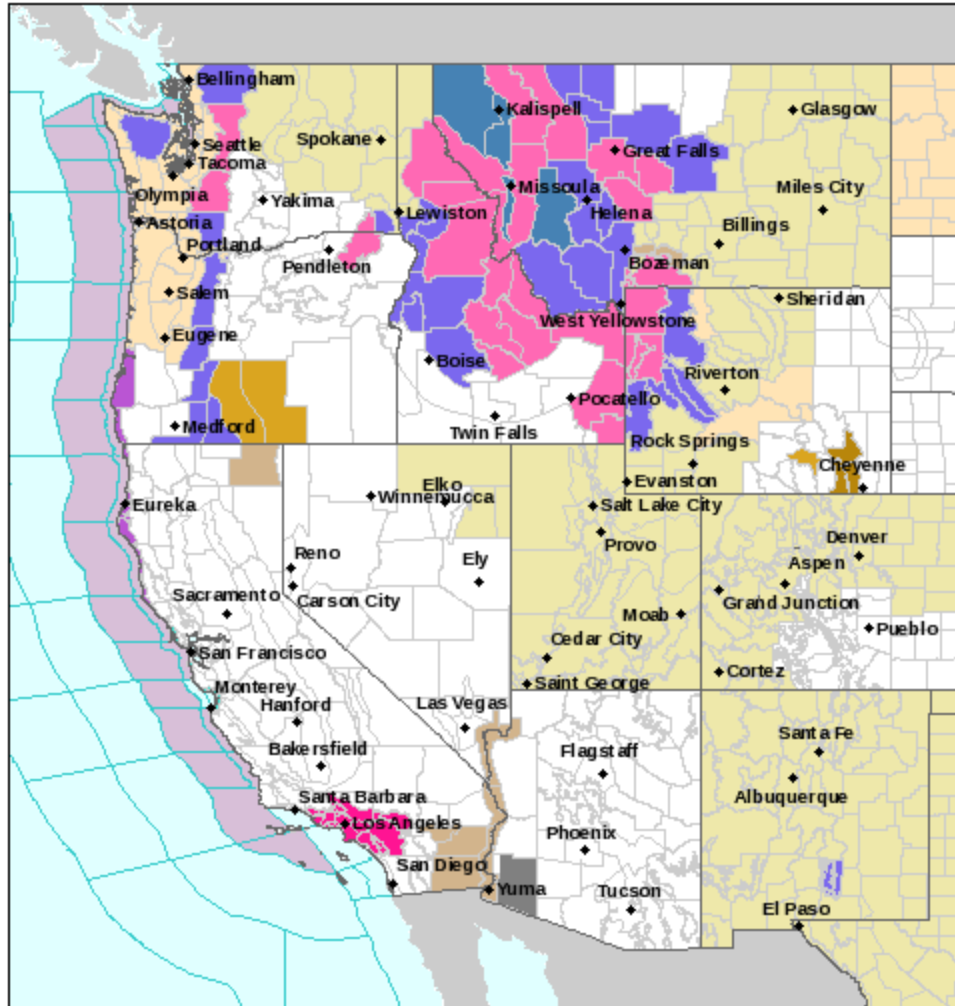

## **NORTHERN CALIFORNIA**

Main forecast concerns for the period starting this weekend through Tuesday night are rain and snow chances to the northern mountains and northern Valley, and low overnight temperatures. Monday and Tuesday near or slightly below freezing for the Valley. Dry weather influenced by an upper level high pressure system in the eastern Pacific will prevail across the forecast area today. Patchy fog and frost are possible in the lower San Joaquin valley this morning, but will taper off quickly in the late morning as temperatures begin to rise. High temperatures will rise to the upper 50s and lower 60s for the valley and foothills, and 40s/50s for the higher elevations, which is a few degrees above average for this time of year. A small weather disturbance will move across the Pacific Northwest and will clip northern California Sunday through Tuesday.

## **SOUTHERN CALIFORNIA**

Strong Santa Ana winds will continue this morning in some areas of Los Angeles and Ventura counties before diminishing through this afternoon. High pressure aloft will build in from the Eastern Pacific supporting gradual warming on Sunday. A deepening trough of low pressure will likely bring cooler conditions with some coastal areas getting low clouds. Locally gusty north winds shifting northeast by the middle of next week.
